

TAKE CONTROL OF YOUR DEVICES, NO MATTER WHO HAS THEM...

With **ADSI Mobile Device Management (MDM)** you can enrol and centrally manage **ALL** your business mobile devices.

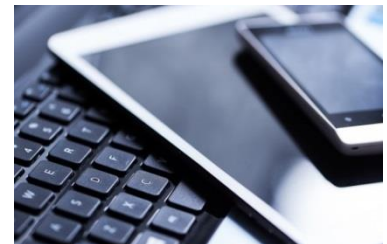

ADSI MDM is powered by IBM and supports iOS, Android, Windows and BlackBerry mobiles and tablets, allowing you to take control of:

ADSI MDM simplifies Mobile Device Management by providing visibility and control of smartphones and tablets within the business. With the increasing volume and diversity of both 'bring your own device' (BYOD) and corporate-owned devices being used in organisations today, a growing challenge for businesses is keeping corporate information secure – **ADSI MDM** is the solution.

KEY FEATURES & BENEFITS;

- **Easily manages your devices remotely;** know where they are and what they are being used for. Restrict, add and manage apps and websites on devices remotely
- **Full tracking solutions** available saving you time and money
- **Quickly and easily deploy managed & unmanaged apps** across your workforce devices remotely. Separating personal and work applications allows you to retain control over devices, ensuring staff complete tasks in work related applications and that no unauthorised apps and sites are accessed
- **Connect to all your business systems whilst on the move,** be as effective outside the office as in it
- **Collaborate with content across your business;** provide your workforce with real-time access and edit functionality across working documents & programs
- **Keep all your Apps and Data secure;** compliance and security to help safeguard devices and data in all registered devices. You can disable, remove data/apps across devices by geographical area, time, employee etc. - all specified by you
- **Expense management** – understand where your data is being used, what apps and websites, so you can then manage unnecessary costs by restricting access
- **Centralised management** to control the mobile devices in your network
- **Monitoring and reporting** to track, diagnose and resolve device and user issues
