

# Blackberry DTEK 50

## Insert the SIM card

Before you begin:

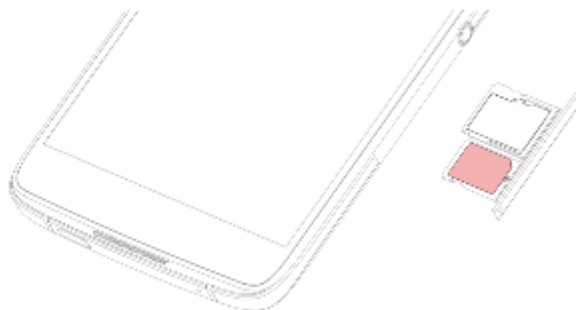

Your device uses a Nano SIM card. If you don't have a SIM card or don't have the right type of SIM card, contact your Account Manager

**CAUTION:** Do not use a larger SIM card that was cut to a smaller size. Your device might not recognise the SIM card, or the SIM card might get stuck because it is thicker than a Nano SIM card.

1. Release the tray by pushing the tip of the tool (provided in the box) into the hole on the right side of your device. If you don't have the tool that came with your device, you can also use a paper clip.

2. Pull out the tray completely and set it on a flat surface.
3. Hold the SIM card so that the metal contacts are facing away from you. Align the notch on the SIM card with the notch in the smaller section of the tray.
4. Put the SIM card in the tray.

5. Push the tray back into the slot.
