

## LG K4 – Getting Started

# Home screen

The Home screen is the starting point for many applications and functions. It allows you to add items like app shortcuts and Google widgets to give you instant access to information and applications. This is the default canvas and accessible from any menu by tapping **O**.

## Getting to Know the Home Screen

1. Status Bar - Shows the device status information, including the time, signal strength, battery status and notification icons.
2. Widget - Widgets are self-contained applications that can be accessed through the Apps drawer or on the Home screen. Unlike a shortcut, a Widget can function as an on-screen application.
3. Application Icons - Tap an icon (application, folder, etc.) to open and use it.
4. Location Indicator - Indicates which Home screen canvas you are currently viewing.
5. Quick Button Area - Provides one-touch access to the function in any Home screen canvas.
