

Sony Xperia L1 - How to insert your sim card

Your device only supports nano SIM cards. The nano SIM card and the memory card have separate slots in the same holder. Make sure you don't confuse the two.

1. Open the nano SIM/Memory card slot cover.
2. Using your fingernail, drag out the nano SIM card tray.
3. Firmly place the SIM card in the correct orientation as shown in the illustration.
4. Insert the memory card in the correct orientation into its slot as shown in the illustration.
5. Gently push the tray back into the slot until it fits into place.

If you needed a new sim card, you will have received a triple sim card pack. You'll need to pop out the appropriate sim card that is needed for your Sony Xperia X Compact.

Mini-SIM

Micro SIM

Nano Sim

Sony Xperia X Compact uses a nano sim card.
