**ONLY
£9.50
a month***

Network news... Mobile Data usage to rocket

Research by GiffGaff estimates that by 2025, customers will be using on average nearly 100GB of mobile data a month thanks to 5G. Mobile video streaming will be the catalyst especially as smartphones are likely to be able to support 4K content in the coming years.

The report predicts that by 2021, users will be consuming 24.76GB of mobile data on video streaming. A huge rise from the 0.83GB of 2017. Online browsing is expected to reach 14.17GB by 2025 compared to just 0.34GB last year. Messaging is also expected to see a large increase, reaching 40.63GB by 2025.

The report estimates that mobile data usage is set to increase by 720% by 2021 with people using devices even more and 5G will have seen a public launch a year or two earlier. To control data usage and costs talk to us about MDM.

The 5G build up

5G is expected to roll out in 2020. Bidding has begun for the latest chunk of the UK's airwaves as networks look to kick start next-generation 5G services and improve existing 4G.

Alongside the main four network; O2, Three, EE and Vodafone, one new player - Airspan Spectrum Holdings - will compete for spectrum.

5G will vastly improve data speeds on phone and tablets but it will also help free up much needed bandwidth to keep billions of devices connected to the web.

Great news for customers

Our Mobile Protection Plan is officially great. It's been around since 2015 and statistics show we settle 98% of claims.

Join our contented, smug customers and make sure you're covered against

- Theft
- Loss
- Breakdown
- Accidental Damage
- Screen & Liquid Damage

for all your handsets

Planning your holidays?

If you are travelling further afield than Europe make sure you keep tabs on your mobile charges whilst you are there.

You can add a 24 hour or 30 day Rest of World Pass to cover your calls, texts and data; everything needed to keep in touch on the move, wherever you go;

Rest of World 24 Hour Pass – just £7.50 for 500MB of data, 200 minutes, 200 texts. Enough for 6 hours of browsing or 1.5 hours of Skype.

Rest of World Pass 30 Day Pass – £99 for 5GB of data, 2000 minutes, 2000 texts. Enough for 65 hours of browsing or 10 hours of Skype.

You only get charged when you need to use it, and if you're getting close to your limit, O2 will send a text to let you know, so there are no nasty surprises. Just like a passport, the Rest of World Pass is an essential for any business trip. Talk to me about your travel plans before you set off...

Travelling in Europe? No worries... any data, calls or texts comes out of your UK monthly allowance

£33
a month****

2 YEAR NO QUIBBLE WARRANTY, INCLUDING DAMAGE

Feeling the pinch after the long winter?

Getting the best tariff deal for your business gas and electricity is paramount this year. Always in the news, the energy industry and big suppliers have undergone scrutiny from regulators and hence had to make changes in the way they price tariffs and handle customers. If you're unsure of the latest changes and would like to have your bills checked FREE of charge, no hassle, no obligation, contact our Energy Team this month for a review on how you're doing.

All you need to do is send us your latest gas & electricity bills and a member of our Energy Team will check your usage and tariff, and look into any savings that can be made.

We contact the energy suppliers for you. Our advice is completely impartial and free. Plus, if you decide to change suppliers on our recommendations, we do all the work for you, from initial paperwork through to connection.

Furthermore, once an Energy customer of ADSI, we keep you informed of any changes throughout your energy contract and when up for renewal again, will search out the best deal once more for you.

Contact us today on 01268 495555 or email energy@adsigroup.co.uk

Why YOU need a hosted phone system?

For many organisations, communications is the backbone of the business, therefore it is vital to have the right phone system in place. The easy option is to stick with your existing in-house phone system but there are numerous reasons for opting for a hosted one...

The reasons for opting for a hosted phone system can be summarised by the 'four C's':

CONTROL

Hosting your phone system in the cloud might seem like a loss of control, or even security, but in fact it can provide your organisation with greater flexibility and enhanced call management capabilities, giving you a better overview of how your phone system is meeting your business demands. You can then decide which parameters need adjusting to meet those needs. You're in control of the system.

COST

There's no need to invest in expensive on-site hardware and there are no ongoing maintenance costs, unlike a traditional phone system with an on-site PBX.

CONVENIENCE

A hosted phone system offers greater flexibility and scalability. It can, for example, integrate your mobile and fixed line services. What's more, as your business grows, your phone system can easily scale to cope with the new demands

CONTINUITY

If a phone system goes down for even a short period, it can have a catastrophic effect on a business. A hosted phone system offers a reliable and resilient solution, with full business continuity features, should a site go down through disaster or unforeseen events.

To arrange an on-site meeting to discuss your phone system call 01268 495555 or email voip@adsigroup.co.uk

Building a GDPR Readiness Plan with ADSI MDM.

So, let's get ready for May 25th... With increasing data flowing through smartphones, tablets and laptop devices, expect the new GDPR regulation to govern those data collection, storage and processing practices.

Compared to traditional software, it is relatively easy to assess GDPR compliance with a MDM solution: since users are employees, their data is already stored in many other applications, but there are quite a few functional complexities to be addressed, including:

- The possibility of capturing PII (Personally Identifiable Information) from a user's device, many of which are corporate devices that employees use for personal activities;
- Segregating corporate data from a variety of personal data such as location, multimedia and app data;
- Maintaining data security on the device as well as the network.

ADSI MDM is committed to establishing best-in-class security, privacy and transparency measures that are compliant with regulatory requirements and best practices.

Ease of Managing Devices

ADSI MDM offers a comprehensive, highly secure platform that manages and protects mobile and Internet of Things (IoT) devices, people and identities, and apps and content. The ease of managing all of the above through a single portal without compromising quality is a unique ADSI MDM offering.

Cognitive Context

ADSI MDM Cognitive Analytics Advisor is a cognitive engine designed to improve Data Controllers' efficiency by providing contextual best practices, productivity improvement opportunities and emerging threat alerts. It helps Data Controllers maintain GDPR compliance with early discovery and improved security, and offers actionable insights and contextual analytics.

Privacy by Design, by Default

ADSI MDM limits access to employees who need it to perform their jobs. The solution also collects, stores and processes minimal personal data.

Secure Data

ADSI MDM encrypts and secures all data at rest and in motion.

Logging, Auditing and Reporting

ADSI MDM offers extensive logging and audit functionality with reporting. This is very helpful in meeting multiple GDPR requirements.

A Trusted Platform

ADSI MDM is delivered from a best-in-class cloud on a mature, trusted platform with Federal Information Security Management Act (FISMA) certification since 2011 and SOC-2 Type II certification since 2007. It is the only FedRAMP-authorized enterprise mobility management (EMM) solution, which entailed an extensive security review of its controls.

Seamless Integration

Our solutions run in the cloud and work seamlessly with customers' on-premises and cloud systems, reducing the effort needed to deploy, scale, maintain and update.

Putting It All Together

With the knowledge that you'll have a trusted platform and seamless integration with your own systems, these are just some of the many reasons why ADSI MDM is the fastest and most cost-effective way to meet new business challenges, support new users, devices, and apps, and comply with upcoming regulations.

Call us to discuss your GDPR and MDM options today 01268 495555

Staff Awards

In 2007 a group of unsuspecting (youngish) people decided to accept jobs at ADSI....

This year Adrian was delighted to present 5 staff with 10 years' service awards.

There was also congratulations to Jackie for 12 years' service and Clare who has now notched up 15 years...

Photo: Rob Foote (Mobiles), Jackie Robinson (Accounts/Operations), Toni Heritage (PA to Adrian), Clare Ladd (Mobiles), Sue Dennison (Marketing), Karly Pavitt (Operations), Chris Jones (Mobiles)

Don't forget to recommend your business contacts to us and earn some extra cash!

If any business you recommended to us takes up one of our services you will receive;

£20
per mobile connection

£20
per electricity or gas switch

£50
per IT Support contract

£20
per VoIP contract

Email your business connections to your account manager or solutions@adsigroup.co.uk and we'll be in touch!

Mount Kilimanjaro Trek *are we mad?*

A small group of ADSI staff have decided to take up the challenge of a lifetime this September and climb the mighty Kil. Training has started for Adrian, Sue and Stuart and they are pushing themselves into a comfortable state of physical fitness for the trek.

We are funding the trip ourselves but have decided to raise money for Great Ormond Street Hospital. If you would like to sponsor us for this challenge and raise funds you can do so on our fundraising page; <https://www.justgiving.com/fundraising/ads-i-kilimanjaro2018>
